

DesignPoint is a professional engineering and surveying firm specializing in municipal/civil projects including infrastructure master planning, land development, municipal infrastructure, hydrologic and hydraulic modelling, flood studies, transportation design, structural design, geotechnical engineering and construction materials testing, environmental engineering, as well as legal and topographical surveys, as well as specialized surveying.

DesignPoint is looking for a **Survey CAD Technician** to work in our Bedford or Bridgewater office. The successful candidate will have the opportunity to work on a wide variety of different projects, using the latest computers and software, and to work closely with the principals and senior staff at the firm.

Key responsibilities include:

- Preparation of legal survey plans;
- Preparation of topographic survey plans;
- Participate in the development of project CAD standards;
- Preparation of location certificates; and
- Preparation of lot grading plans.

Key requirements include:

- 2+ years of relevant experience.
- Completion of a survey technician or technologist program or equivalent;
- Strong working knowledge of AutoDesk Civil 3D would be an asset;
- Ability to self-initiate and problem solve;
- Attention to detail;
- Strong written and oral communication (English) skills; and
- Ability to work in a team environment.

Key Benefits:

- Close working relationship with principals and senior staff at the firm;
- Respectful and collaborative work environment;
- Ability to grow and develop with a local firm;
- Career and personal development opportunities; and
- Competitive remuneration packages.
